Pre-Surgical Consent Form

Surgery:

If your pet is to be anesthetized, rest assured that advances in anesthesia and surgery have made routine procedures relatively safe with a low rate of complications. Nevertheless, occasional problems can arise due to pre-existing conditions not evident during routine pre-anesthetic examinations. To avoid these problems, we recommend that all of these cases be screened prior to anesthesia by means of the following laboratory test, in addition to this laboratory test, we also recommend IV fluid therapy during surgical procedures, and post-operative analgesia as your pet may experience discomfort after various surgical procedures.

BY INITIALING AND SIGNING BELOW.

These procedures will be performed (and you will be billed for them).

Initial for Approved Services.
